

# COREQUISITES AND PREREQUISITES

---

## Corequisites and Prerequisites Policy

Students are required to follow all prerequisites and comments listed in the Schedule of Classes and Undergraduate or Graduate Catalog, or the "Course Descriptions" section. Special attention should be given to courses in which a concurrent election is required (e.g., Chemistry 134). For such courses, the student must also register for the Recitation/Laboratory if different from the course reference number (CRN) for the lecture. Students will be prevented from registering for courses for which the proper corequisites and prerequisites are missing. Any exceptions to this policy requires approval from the department or college offering the course.
