

# MECHANICAL ENGINEERING (ME)

## Course Descriptions

### ME 230 Thermodynamics 4 Credit Hours

The course is a general introduction to thermodynamics. Properties of pure substances. Work and heat. The first and second laws of thermodynamics. and their applications to engineering systems. Energy, entropy, exergy and efficiency. Vapor and gas power cycles. Heat pumps and refrigeration. Reacting mixtures and combustion. (F, W).

**Prerequisite(s):** PHYS 150 and MATH 116 and (CHEM 134 or CHEM 144)

**Corequisite(s):** ME 230R

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

Cannot enroll if Major is

### ME 230R Thermodynamics 0 Credit Hours

Recitation component for ME 230. Must be taken concurrently with ME 230.

**Corequisite(s):** ME 230

### ME 260 Design Stress Analyses 4 Credit Hours

Vector treatment of static force and moment equilibrium of particles, rigid bodies and plane structures. Fundamental mechanics of materials: stresses and deformation in axial loading; torsion; bending; shear. Combined loadings. Stress and strain transformations. (F,W,S).

**Prerequisite(s):** PHYS 150 and (ENGR 250\* or ECE 385\*) and (MATH 205\* or MATH 215\*)

**Corequisite(s):** ME 260R

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

### ME 260R Design Stress Analysis 0 Credit Hours

Recitation component of ME 260. Must be taken concurrently with ME 260.

**Corequisite(s):** ME 260

### ME 265 Applied Mechanics 4 Credit Hours

A comprehensive introduction to the science of applied mechanics, encompassing a study of forces and the stresses, deflections, and motions which they produce. Topics include the concept of equilibrium and static force analysis; the mechanics of deformable bodies (internal stresses, constitutive relationships, strains, deflections, failure); statics of indeterminate systems; kinematics; kinetics of particles, systems of particles, and rigid bodies. Four hours lecture. This course is not open to ME majors (F, S, W).

**Prerequisite(s):** PHYS 150 and (MATH 205\* or MATH 215\*)

**Restriction(s):**

Cannot enroll if Major is Mechanical Engineering,

### ME 290 Spec Topics in Mech Engin 1 to 3 Credit Hours

Special topics in mechanical engineering selected according to students' interest and availability of instructors and equipment.

### ME 320 Fluid Mechanics 4 Credit Hours

This course introduces the students to the fundamentals and methods of fluid mechanics. Topics covered include fluid statics, fluid kinematics and dynamics, integral and differential analysis of fluid flows, dimensional analysis and similitude, boundary layer and Stokes flow approximations, internal flows and flows in pipe networks, external flows. Students learn and receive practical training in experimental and visualization techniques in the accompanying lab. (F, W).

**Prerequisite(s):** ME 230 and ME 260 and (ENGR 200\* or ENGR 216\*)

**Corequisite(s):** ME 320L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

### ME 325 Thermal Fluid Sciences I 4 Credit Hours

Power and refrigeration cycles. Thermodynamic relations. Ideal gas mixtures and psychrometrics. Reacting ideal gas mixtures. Fluid properties. Fluid flow kinematics. Integral fluid flow analysis; the conservation laws - mass, energy, momentum. Introduction to differential analysis of fluid flow. Dimensional analysis. (F,W,S).

**Prerequisite(s):** ENGR 216 and ME 230 and ME 260

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

### ME 345 Engineering Dynamics 4 Credit Hours

Vector treatment of the kinematics and kinetics of particles, systems of particles and rigid bodies. Newton's laws, work/energy and impulse/momentum principles. Introduction to mechanical vibrations. (F, S, W).

**Prerequisite(s):** ENGR 216\* and ME 260 and (MATH 216 or MATH 228)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

### ME 349 Instrument & Measurement Systems 3 Credit Hours

Modern instrumentation systems are considered beginning with generic issues such as calibration, error analysis, and dynamic response characteristics of instrumentation. Specific transducer systems (temperature, force and pressure, etc.) are presented, as well as interfacing techniques and elementary signal processing. (F,W,S).

**Prerequisite(s):** (ME 265 or ME 345) and ECE 305

**Corequisite(s):** ME 349L

**Restriction(s):**

Can enroll if Class is Sophomore or Junior or Senior

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science

### ME 355 Modeling and Analysis of Dynamic Systems 4 Credit Hours

This course introduces students to the mathematical modeling of dynamic systems in various energy domains (mechanical, electrical, electromechanical, and hydraulic). Introduction to the bond graph method. Analysis of linear system responses. Analytical and computer-based simulation of system behavior. (F, W).

**Prerequisite(s):** ECE 305 and ME 345

**Corequisite(s):** ME 355L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 3601 Design and Analysis of Machine Elements 4 Credit Hours**

Application of mechanics of materials to analysis and design of elementary mechanical components and systems. Topics include: stress and strain analysis; stress concentration; failure theories; safety factor; fatigue; fracture; combined loading; impact; buckling. Components considered: fasteners; springs; bearings; gears; beams; shafts and other power transmission components. Numerical techniques. (F, W).

**Prerequisite(s):** (ENGR 216 or ENGR 200 or ME 215) and (ME 260 or ME 265)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

Cannot enroll if Major is

**ME 364 Probability, Statistics, and Relativity in Machine Design 3 Credit Hours**

Introduction to probability, statistics, and reliability with emphasis on mechanical engineering applications. The course covers basic probability, descriptive statistics, probability distributions of discrete and continuous variables, statistical inferences, DOE (design of experiments), ANOVA (analysis of variance), regression, and correlation. (F, S, W).

**Prerequisite(s):** ME 260 and (ENGR 216 or ENGR 200)

**ME 371 Heat Transfer 4 Credit Hours**

The course introduces the students to the fundamentals and methods of heat transfer. Topics covered include principles of heat transfer, heat conduction, forced and natural convection, heat exchangers, radiation heat transfer. Students learn and receive practical training in experimental and techniques in the accompanying lab. (F, W).

**Prerequisite(s):** ME 320 and ECE 305\*

**Corequisite(s):** ME 371L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 375 Thermal Fluid Sciences II 4 Credit Hours**

Mechanisms of heat transfer processes. Steady state and transient conduction. Numerical methods in conduction. Internal and external flows. Boundary layer theory. Convection heat transfer in internal and external flows. Natural Convection. Heat exchanger theory. Introduction to radiation. (F, S, W).

**Prerequisite(s):** ME 325 and ECE 305\*

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 379 Thermal-Fluids Laboratory 3 Credit Hours**

An experimental investigation of thermodynamic, fluid mechanic, and heat transfer principles. Students will learn about thermal-fluids instrumentation and conduct experiments. In addition, they will design their own experiments to demonstrate their understanding of the principles. (F,W,S).

**Prerequisite(s):** ME 325 and (ME 349 or BENG 351) and ME 375\* and (COMP 270 or COMP 106 or Composition Placement Score with a score of 40 or Composition Placement Score with a score of 107 or COMP 220)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 381 Manufacturing Processes I 4 Credit Hours**

This course introduces the students to the fundamentals and principles of manufacturing processes for engineering materials. It seeks to transfer an understanding of the application of principles of engineering materials and their influence on manufacturing processes. Topics covered include structure and properties of materials, various conventional shaping processes viz. solidification, powder and particulate, deformation, and material removal processes; heat treatment and surface processing, and materials joining. Topics on recent advancements including but not limited to microfabrication, nanofabrication, additive manufacturing is also covered. Case studies of design for manufacturing and measurement of product quality; economical aspects and cost considerations in manufacturing systems will be studied. Students complete a project, in which they design and implement a manufacturing process. Three lecture hours and three laboratory hours. (F, W, S).

**Prerequisite(s):** ENGR 250 and (ME 260 or ME 265)

**Corequisite(s):** ME 381L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 410 Finite Element Methods with Application 3 Credit Hours**

A presentation of the basic concepts and fundamentals of the Finite Element Method of Analysis in general, followed by applications to both continuum and field problems. Selected areas of application: dynamics and vibration including wave propagation; acoustics; fluid mechanics including film lubrication and ground water flow; heat transfer; elasticity and stress/strain analysis including structures; electrical field problems including electrostatics and electromagnetics (YR).

**Prerequisite(s):** (ME 345 and ME 3601 and (ME 371\* or ME 375\*)) or (BENG 325\* and BENG 370\*)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4191 Structural Mech & Design 4 Credit Hours**

A presentation of the methods of plane elasticity to solve a variety of problems arising in the analysis and design of structures. Review of the concepts of plane stress and strain, basic equations of plane elasticity and problems, energy methods approximate/numerical techniques, elastic-plastic bending and torsion, fracture and fatigue. (YR).

**Prerequisite(s):** ME 345 and ME 3601

**Restriction(s):**

Can enroll if Class is Junior or Senior

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science

**ME 4202 Design of Turbomachinery and Wind Generation 4 Credit Hours**

Principles of turbomachinery design and practices with emphasis on wind power generation. Euler's equation for energy transfer calculations. Two- and three-dimensional velocity diagrams. Aerodynamics of wind turbines. Wind turbine design and control. Power generation of wind turbines, wind energy system economics and environmental impacts. Design procedures and characteristics of compressors, fans and blowers. Basic design calculations and selection of pumps. A turbomachinery design project by using the theory learned from the course may be required. (YR).

**Prerequisite(s):** ME 375 or ME 320

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 421 Dynamics/Therodynamics 3 Credit Hours****ME 423 Thermal Systems Design & Optimization 4 Credit Hours**

Design, analysis, and optimization of thermal fluid systems using principles of thermodynamics, fluid mechanics, and heat transfer. Application of thermal sciences in component and system design. Optimized design methodology for improving operations of thermal systems to minimize energy consumption and/or operating costs. (OC)

**Prerequisite(s):** ME 375\* or ME 371\*

**Restriction(s):**

Can enroll if College is Engineering and Computer Science  
Cannot enroll if Major is

**ME 4301 Computational Thermo-Fluids 3 Credit Hours**

This course introduces students to fundamentals and practical skills of computational fluid dynamics and heat transfer. Governing equations and their mathematical classification. Spatial and temporal approximation techniques, stability, consistency, and convergence. Finite-difference and finite-volume formulations. Survey of methods for solving discretized equations. Applications to technological flow and heat transfer problems. (YR).

**Prerequisite(s):** (ME 325 or ME 320) and (ME 375\* or ME 371\*)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4361 Design of HVAC Systems 4 Credit Hours**

A comprehensive treatment of the design principles and practices in the heating, ventilating, and air conditioning. Psychrometrics, design loads, distribution systems, equipment selection. (YR).

**Prerequisite(s):** (ME 325 or ME 320) and (ME 375\* or ME 371\*)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 440 Intro to Mechanical Vibrations 3 Credit Hours**

This introductory course on mechanical vibrations covers theories with applications, which include free and forced vibration analysis of damped and undamped, discrete (ranging from single to multi-degree-of-freedom), and simple continuous structures (such as strings, shafts, and beams), and design of vibration absorbers. Students may not receive credit for both ME 440 and ME 4461. (YR)

**Prerequisite(s):** ME 345 and ME 349

**Restriction(s):**

Can enroll if College is Engineering and Computer Science  
Cannot enroll if Major is

**ME 442 Control Systems Analysis and Design 4 Credit Hours**

Modeling of mechanical systems and feedback controllers using Laplace transform techniques and block diagram analysis. System response characteristics and stability criterion. Introduction of feedback concepts, including analysis and design of feedback controllers using root locus techniques. Frequency response concepts and use of frequency response measures in stability analysis and controller design. (F, W).

**Prerequisite(s):** ECE 305 and (ME 345 or ME 265)

**Corequisite(s):** ME 442L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 445 Sound and Noise Controls 4 Credit Hours**

Full Course Title: Introduction to Sound and Noise Controls This course covers basic topics in sound theory, applications, and noise control system design. Topics include sound generation, radiation and transmission, human hearing system mechanism, sound quality metrics, design of silencers, mufflers and resonator, audio system and speaker design, building acoustics, acoustical material properties and material testing, sound measurement, and Octave band analysis. The student is required to conduct a course project related to noise control system design. Students may not receive credit for both ME 445 and ME 4461. (YR)

**Prerequisite(s):** (ME 265 and BENG 351) or (ME 345 and ME 349)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science  
Cannot enroll if Major is

**ME 4461 Mech Vibration & Noise Control 4 Credit Hours**

Fundamentals of mechanical vibration and principles of noise control. Use of transducers and instruments to conduct sound and vibration measurements. Free and forced vibration in single and multiple degrees-of-freedom systems, damping, eigenvalues, eigenvectors, frequency response function, modal analysis, description of sound fields, acoustical materials and material testing, acoustics of rooms and enclosures, sound quality, and principles of noise control. Students will be required to conduct either a vibration or a noise control project. Two one-and-one-half hour lectures and one three-hour laboratory. (YR).

**Prerequisite(s):** (ME 345 or ME 265) and (ME 349\* or BENG 351\*)

**Corequisite(s):** ME 4461L

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4471 Solar Energy Sys Analy&Design 4 Credit Hours**

The course introduces students to the fundamentals of solar energy conversion and solar energy systems. Principles in thermodynamics and heat transfer required to understand the solar energy use is reviewed. Design of different types of solar energy systems are explored and assessed. Issues relating to the practical implementation of solar energy will also be considered. (OC).

**Prerequisite(s):** (ME 325 or ME 320) and (ME 375\* or ME 371\*)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science  
Cannot enroll if Major is

**ME 4500 Design of Automotive Chassis and Body Systems 3 Credit Hours**

This course provides a systems approach to the design of automotive chassis and body components and examines the influence of their design on the overall structural performance of the vehicle. Design issues related to structural rigidity, ride comfort, safety and crash-worthiness, and durability are covered. Analytical tools used in automotive structural design are also discussed. (YR).

**Prerequisite(s):** ME 260 and ME 345

**Restriction(s):**

Can enroll if Level is Undergraduate  
Can enroll if College is Engineering and Computer Science

**ME 452 Sustainable Energy & Environment 4 Credit Hours**

This course introduces students to fundamentals of energy sources. It covers a wide range of conventional and alternative, (including renewable) sources, and presents tools for assessing their sustainability and environmental impacts. It also reviews issues related to energy storage, transportation and distribution, challenges, and future opportunities. A course project is completed involving the design and plan for practical implementation of a sustainable energy technology. (YR).

**Prerequisite(s):** (ME 325 or ME 320) and (ME 375\* or ME 371\*)

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4550 Computational Uncertainty Quantification for Engineering Applications 3 Credit Hours**

This course focuses on a probabilistic (Bayesian) treatment of uncertainties in modeling a system's behavior, specifically adapted to mechanical engineering and bioengineering problems. This treatment extends to both making predictions under uncertainty (predictive modeling) as well as updating our knowledge about the system model using data/measurements (Bayesian inference). The course will emphasize both (i) applications with physical models as well as (ii) applications with statistical models build entirely based on data/inference. The course will start by briefly reviewing the foundations of probability as a multi-valued logic that quantifies all our available knowledge about a real system and its environment. This leads to a rigorous meaning for the probabilistic model for a system. The main part of the course focuses on computational tools for (i) predictive analysis (i.e., uncertainty propagation) and (b) Bayesian system estimation/identification (i.e., model updating based on experimental observations). (OC).

**Prerequisite(s):** ME 364 or BENG 364 or IMSE 317

**ME 460 Design for Manufacturing 3 Credit Hours**

Design decisions based on manufacturability process-property relationships and sustainability. Design for assembly, manufacturing tolerances and quality control. Design methodology in digital age. (OC).

**Prerequisite(s):** ME 3601 and ME 381

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4640 Linear Systems Control 3 Credit Hours**

This course covers fundamental properties of linear dynamic systems. The topic will include linear space, linear operators, eigen-values/vectors, canonical form, representation, solution of state equations, stability, controllability, observability, design of state feedback control and observer with application examples in mechanical engineering. (YR).

**Prerequisite(s):** ME 442

**Restriction(s):**

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science

**ME 4671 Senior Design I 4 Credit Hours**

A guided design project course with emphasis on the decision-making process associated with establishing alternatives and evaluation procedures to synthesize designs. Students propose design projects and work in teams to produce analytical designs, and conduct evaluative experiments, and/or construct a physical design prototype. Engineering ethics and responsibility. At the end of the semester, the students are required to submit written reports and give oral presentations with a demonstration of their projects. (F,W).

**Prerequisite(s):** ME 345 and ME 3601 and ME 375 and ME 379\*

**Restriction(s):**

Can enroll if Class is Junior or Senior

Can enroll if Major is Mechanical Engineering

**ME 4681 ME/BENG Dual Senior Design 4 Credit Hours**

Full Title: Interdisciplinary Senior Design for ME/BENG Dual Degree Students A guided interdisciplinary design project course where student teams propose design projects, design a device, system or process related to mechanical-and bio-engineering and conduct evaluative experiments and/or construct a physical prototype. Engineering ethics and responsibility. At the end of the semester, the students are required to submit written reports and give oral presentations with a demonstration of their projects. Credit can only be awarded for one of the following courses: BENG 4671, ME 4671, and ME 4681. (F, W).

**Prerequisite(s):** BENG 300 and BENG 351 and BENG 370 and ME 3601 and (ME 375\* or ME 371\*) and (BENG 375 or BENG 381)

**Restriction(s):**

Can enroll if Class is Junior or Senior

Can enroll if Major is

**ME 469 Senior Design II 1 to 4 Credit Hours**

Student teams develop mechanical or interdisciplinary design projects, or continue projects begun in ME 4671. Work includes mechanical engineering design, and could possibly include fabrication and testing. Projects can involve efforts by interdisciplinary teams. Written and oral presentations are required.

**Prerequisite(s):** ME 4671

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 472 Prin & Appl of Mechatronic Sys 4 Credit Hours**

This course provides the student with hands-on interdisciplinary experience of mechatronic systems, which integrate mechanical, electrical/electronic components with microprocessors to design a high-performance system. Subjects include Mechanical and Electrical Actuators, Digital Transducers and Modulators, Microcomputers and Microcontrollers. Laboratory projects cover robotic programming, materials handling, and fluid power systems. Student will be required to perform a course design project with mechatronic application in nature. (OC)

**Prerequisite(s):** (ME 265 or ME 345 or ECE 347) and (ECE 305\* or ECE 311\*)

**Restriction(s):**

Cannot enroll if Class is Freshman or Sophomore

Can enroll if College is Engineering and Computer Science

**ME 4790 Aerodynamics of Road Vehicles 3 Credit Hours**

This course covers the fundamental principles, numerical modeling, and experimental analysis of the aerodynamics of road vehicles. Practical applications to the design and operation of cars, vans, trucks, buses, and motorcycles are also discussed. The course includes hands-on projects using computational fluid dynamics software. (YR).

**Prerequisite(s):** ME 320 or ME 325

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 481 Manufacturing Processes II 3 Credit Hours**

A study of casting, welding, plastic forming, and machining of materials; analysis of forces, energy requirements, and temperature effects; design specifications economically obtainable in terms of dimensional accuracy, surface finish, and material properties, functional characteristics of equipment. Two lectures and a laboratory. (OC).

**Prerequisite(s):** ME 381

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 483 Dsgn Cons in Poly and Comp Mat 3 Credit Hours**

Physical and mechanical behavior of unreinforced and reinforced (composite) polymeric materials in relation to their applications in modern technology. Emphasis is given to the design considerations with these materials in contrast to those with metallic materials. Time-dependent properties, such as creep and stress relaxation, are considered. (OC).

**Prerequisite(s):** ME 360 or ME 3601

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 490 Directed Design Project 1 to 3 Credit Hours**

Directed design project involving not only design but also analysis, fabrication, and/or testing. Topics may be chosen from any of the areas of mechanical engineering. The student will submit a report on their project and give an oral presentation at the end of the term. Enrollment in this course requires approval from the ME department. Registration for more than 1 credit is only permitted in special cases and will be considered on an individual basis. (F, S, W).

**Restriction(s):**

Cannot enroll if Class is

Can enroll if College is Engineering and Computer Science

**ME 491 Directed Research Problems 1 to 3 Credit Hours**

Special problems selected for laboratory or library investigation with intent of developing initiative and resourcefulness. Enrollment in this course requires approval from the ME department. Registration for more than 1 credit is only permitted in special cases and will be considered on an individual basis. (F, S, W).

**Restriction(s):**

Cannot enroll if Class is

Can enroll if College is Engineering and Computer Science

**ME 4910 Degradation of Materials 3 Credit Hours**

The course will introduce students to the fundamentals of corrosion behavior and environmental degradation of materials. The environmental degradation of metals, polymers, and composites will be discussed. Monitoring and life prediction techniques will be covered. Preventive measures such as materials selection and design, protective coating, surface treatments, inhibitors, and electrochemical techniques are applied, when they should be used, and how various techniques can be integrated to solve complex problems. (YR).

**Prerequisite(s):** ENGR 250 and ME 381

**Restriction(s):**

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science

**ME 492 Guided Study in Mechanical Engineering 1 to 3 Credit Hours**

Individual study, design, or laboratory research in a field of interest to the student. Topics may be chosen from any of the areas of mechanical engineering. The student will submit a report on their project at the end of the term. Enrollment in this course requires approval from the ME department. Registration for more than 1 credit is only permitted in special cases and will be considered on an individual basis. (F, S, W).

**Restriction(s):**

Cannot enroll if Class is

Can enroll if College is Engineering and Computer Science

**ME 493 Advanced Vehicle Energy Systems 3 Credit Hours**

This course will introduce the advanced energy conversion systems in automotive vehicles and cover the fundamentals, characteristics, and design consideration of the energy systems. The topic includes using alternative fuels in internal combustion engines, advanced power train systems in hybrid, electric, and fuel cell vehicle, and exhaust energy recovery systems. (YR).

**Prerequisite(s):** (ME 320 or ME 325) and (ME 371\* or ME 375\*) and ECE 305

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

**ME 4950 Digital Manufacturing and Product Innovation 3 Credit Hours**

This combined lecture and hands-on project course aims to familiarize students to optimize the interplay of materials, people, machines and products. The course introduces approaches to develop product concepts with commercial potential. Student teams will explore market needs, conceptualize product ideas to cater to those needs and explore the intellectual property space around their ideas. Students will iteratively develop prototypes via digital manufacturing (e.g., 3D CAD/CAM files manifested via digital printing or machining). Early stage prototypes will progress into more sophisticated designs, scaling up (cost, pricing, tooling, process flow and automation) scenario planning for manufacturing. Concepts of direct digital manufacturing and the associated tools will be discussed. Methods of real time data acquisition, quantitative data analysis, and predictive analytics will be discussed. (YR).

**Prerequisite(s):** (ME 349 or BENG 351 or IMSE 4825 or ME 442) and (ME 364 or BENG 364 or IMSE 317) and ME 230 and (ME 381\* or IMSE 382\* or BENG 381\*)

**Restriction(s):**

Can enroll if Level is Undergraduate

Can enroll if College is Engineering and Computer Science

**ME 496 Internal Combustion Engines I 3 Credit Hours**

Comparison of several forms of internal combustion engines including Otto and diesel-type piston engines; performance parameters and testing; thermodynamic cycles and fuel-air cycles; combustion in SI and Diesel engines; charge formation and handling; ignition; elements of exhaust emissions. (OC).

**Prerequisite(s):** (ME 325 or ME 320) and (ME 371\* or ME 375\*)

**ME 4981 Automotive Engineering 4 Credit Hours**

The course covers the basic topics in automotive engineering: a) fundamental vehicle dynamics; b) Engine-transmission compatibility and matching; c) analysis of vehicle performance in acceleration, gradability, speed, fuel economy, ride comfort, stability and safety; d) computer modeling and simulation of vehicle systems by numerical techniques; e) transmission design and analysis; f) design of vehicle systems such as brakes, suspensions, steering mechanisms and other subsystems. (YR).

**Prerequisite(s):** ME 345 and ME 3601

**Restriction(s):**

Can enroll if College is Engineering and Computer Science

Cannot enroll if Major is

\*An asterisk denotes that a course may be taken concurrently.

**Frequency of Offering**

The following abbreviations are used to denote the frequency of offering: (F) fall term; (W) winter term; (S) summer term; (F, W) fall and winter terms; (YR) once a year; (AY) alternating years; (OC) offered occasionally
